Hold On

em G D em
Mercy, mercy, where are you going, where do you want to be?
em G D em
Not there in the middle of that river, heading out to sea
em G D em
You can't swim and you can't holler, you can barely breath
em G D em
I only hope you've got trick or two still up your sleeve

em G D em
Even all the angels watching over you can't rearrange your fate
em G D em
And you might have to fall another time or two before you get it straight
em G D em
So roll those dice and pay the price for every choice you make
em G D em
But when you skate around on thin, thin ice you know it can break

C G am G D G
Hold on, hold on, don't let it slip away
C G am G F em
Hold on, hold on, one more day

em G D em
When you grow a few more feathers for your wings then you will surely fly
em G D em
But first you have to grow a big, big heart and prepare to touch the sky
em G D em
So dig your heels into a dream that sets your soul on fire
em G D em
And when you want to find your own way home don't make your angels cry

CHORUS

©2005 Cindy Lowe / Recorded on *Everlasting*

Note: I play this in fm by putting a capo on the 1st fret.
