

I'll Never Let Go

A E
I once led a life of earth and of fire
f#m D
Water and air and dream and desire
A D
A mind full of dangers that never rang true
E
A heart full of strangers that kept me from you
A E
I let go of glory and passion and power
f#m D
Making up time made of minutes and hours
A D
All of my darkness and all of my good
E
I let go of loving the way that I should

D E
But I'll never let go; I'll never let go
f#m D E A
I'll never let go; I'll never let go of you
D E
I'll never let go; I'll never let go
f#m D E A
I'll never let go; I'll never let go of you

I let go of summer; I let go of snow
Flying too high and falling too low
All of my visions of heaven and hell
The warmth of a hearth and the cold of a cell
I was blessed by the sun, the moon and the stars
I let go of demons that darkened my heart
I let go of family, lovers and friends
Let go of my self as I rounded the bend

CHORUS

Boundaries and countries mean nothing to me
I let go wanting what never can be
All of my chains of iron and gold
All of my claims to be young or old
My boxes of rags, my trappings of wealth
With so little warning were swept off the shelf
I let go of roses, ashes and bones
Let go of hope; I let go of my home

CHORUS

Note: I play this in an obscure open B tuning but these chords work.
